

Summer Work for A.P Physics – B

Answer the questions and problems as indicated. All of the chapters are from the first volume of the Cutnell and Johnson Physics text (the same as Honors Physics). Show all of your work, and indicate your answer with units in a box. This assignment will be collected on the first day that we meet in August. I suggest that you do most if not all of the work in August so that you are tuned up for the problem solving of the A.P. Course. Good luck, and have a great summer.
